PROFILE

Results-oriented Web Engineer with over **3 years of experience** in full-stack development and automated quality assurance. Currently pursuing an MSc in Web Engineering and working with **EEX Group** to automate high-stakes physical settlement processes using **Python, Playwright, and Docker**. Proven expertise in building clean UIs with **React and Angular** and developing AI-powered tools for web accessibility.

EDUCATION

Master of Science in Web Engineering
Technische Universität Chemnitz
10.2024 – present | Germany

Bachelor of Engineering in Computer Engineering
Savitribai Phule Pune University
07.2018 – 04.2022 | India

DIGITAL SKILLS

- **Programming:** C++, Python, Java, JavaScript, SQL.
- **Automation & QA:** Playwright, Docker, Allure, CI/CD, Manual Testing.
- **Web Technologies:** React.js, Angular, Node.js, Spring Boot, REST APIs.
- **Cloud & AI:** AWS Certified Cloud Practitioner, Generative AI Essentials.
- **Tools:** Git, Jira, ServiceNow, Performance Monitoring, OOP.

CERTIFICATES

- AWS Certified: Cloud Practitioner
- DevOps Foundations(CI/CD): LinkedIn
- AWS Certified: Generative AI Essentials
- Capgemini: Developer (Level 1 & 2)
- Coursera: Agile Software Development
- Google GenAI Certificate – Google Cloud
- Python for Data Science – IBM

LANGUAGES

- English (C1)
- German (A2 - Learning B1)

PROFESSIONAL EXPERIENCE

EEX Group (European Energy Exchange)

Working Student – Test Automation (Physical Settlement)

09.2025 – Present | Leipzig, Germany

- **Automation:** Developing a GUI automation framework with Python and Playwright to streamline physical settlement workflows.
- **DevOps & Reporting:** Utilizing Docker for containerized execution and Allure for advanced stakeholder reporting.
- **Business Collaboration:** Translating complex settlement requirements into technical automation tasks in collaboration with the development and business teams.
- **QA Support:** Assisting in daily manual testing and verification to ensure 100% accuracy in high-value energy transactions.

AI2Connect GmbH

Working Student – Software Developer

06.2025 – 08.2025 | Dortmund, Germany

- **AI Development:** Contributed to the **AI2AccessPilot** project, an AI-powered software designed to transform standard websites into accessible formats.
- **Frontend:** Developed user-facing features using React.js to improve web accessibility and user experience.
- **Technical Documentation:** Authored comprehensive technical documentation for AI-driven software modules.
- **Agile Execution:** Managed tasks and workflows efficiently using Jira within a fast-paced startup environment.

Capgemini

Software Analyst

09.2022 – 05.2024 | Pune, India

Enterprise Application Development (Java, Node.js, Spring Boot, REST APIs)

- Built and maintained scalable enterprise web applications, reducing API response time by 30%.
- Developed modular UI components with Angular, ensuring performance and responsiveness across browsers.
- Integrated RESTful APIs with clean code practices and attention to accessibility and UX.
- Maintained codebase using GitHub, ensuring proper version control, PR reviews, and continuous integration.

Automation Tool Development (JIRA & ServiceNow Integration)

- Created a custom tool automating synchronization between JIRA and ServiceNow, cutting manual tracking time by 50%.
- Improved internal documentation and task visibility through structured workflows and UI enhancements.

Performance Optimization & Monitoring

- Optimized backend SQL queries, reducing data retrieval latency by 40%.
- Used performance monitoring tools to debug and resolve issues in staging and production.

Capgemini

Trainee Software Developer

01.2022 – 04.2022 | Pune, India

Microservices-Based Enterprise Applications (Java, JavaScript, Angular)

- Developed and documented microservices-based features to support real-time service communication.
- Implemented REST endpoints and collaborated with frontend teams to integrate UI workflows.

Cloud-Based Testing & Optimization (AWS, Citrix, O365)

- Worked with cloud-based testing environments, optimizing performance and system scalability.

Neuronode Technologies Pvt. Ltd.

Software Development Intern

07.2021 – 09.2021 | Pune, India

Stock Portfolio Web App Development (Python, Streamlit, Quandl API)

- Built a real-time stock analysis app using Streamlit and Quandl API, implementing dynamic UI filters and clean data visualization.
- Integrated basic SEO principles and optimized performance for deployment-ready output.
